

COLSOV9Pi

9 Ton Log Splitter for tractor linkage.

Specifications:

- **9 ton splitting force** (requires 230Bar hydraulic pressure)
- **Fits any size tractor.** Category one linkage points can be fitted with category 2 bushes.
- **Two speed hydraulic ram.** If it does not split on fast speed, pull the levers further for slow speed and increased splitting force.
- **Automatic return.** When you let go of the levers, the ram retracts automatically whilst you are getting the next log.
- **Safety cut-out (a).** Prevents trapping of hands if a log jams on the wedge.
- **150mm /6 inch Splitting Wedge (b).** Replaceable full size for maximum splitting without jamming. One bolt fixing to cylinder & four on guide bar.
- **Replaceable guide bushes (c).** The V9 has no metal-on-metal contact point as it uses replaceable nylon bushes for long service.
- **Large reinforced Base Foot (d).** Wide enough to take large diameter logs. Double skin and reinforced underneath for strength
- **Big Capacity (e).** Maximum log length of 55cm / 22 Inch.
- Weight 80kg
